

Does your child have ADHD and are they negative, hostile or defiant?

Symptoms of Oppositionality

- Easily annoyed
- Loses temper
- Defies
- Blames others
- Angry and resentful
- Argues with adults
- Deliberately annoys people

If your child is 6 to 12 years old, has Attention Deficit Hyperactivity Disorder (ADHD) or you think they may have ADHD and they also show symptoms of oppositionality (for Example negativity, hostility, or defiance) they may be eligible to participate in a clinical research study. This investigational study medication is a non-stimulant, and is for both ADHD and symptoms of oppositionality.

Study participants will receive at no cost:

- Study related physical exams and laboratory service
- Study medication
- ADHD evaluations
- One-on-one, unhurried private physician visits

PRA Trials will work with you and your child to help create the best possible environment for your child's support and comfort

Medical Insurance is not needed

Compensation will be provided for time and travel
